PROFILE

Developer with 15 years building web applications in PHP, Laravel and WordPress, with React and TypeScript on the front end. I write tests, lean on SOLID where it helps, and care about code that is easy to change. Self-taught. I build ShipMyForm, a form backend for developers, and I run brahui.dev — where I built an English-Brahui corpus and fine-tuned a neural translation model in PyTorch. I also maintain several open-source PHP and JavaScript libraries.

EXPERIENCE

Software Developer • Stack Builders

Jan 2019 — Present

- Write and review full-stack features across Laravel, PHP and JavaScript.
- Keep code easy to change with a TDD habit and SOLID principles.
- Built and shipped ShipMyForm, and run brahui.dev — an English-Brahui translation model.

Development Team Lead • The Brand Crew

Jan 2014 — Dec 2018

- Led a small team building WordPress and Laravel projects for agencies and brands.
- Built WordPress themes with the Timber library and Twig.
- Shipped work for HBL, Knorr, Peek Freans, EBM and Olivia.

WordPress Developer • BOLAN SOFT

2012 — 2014

- Built custom WordPress themes and plugins for agency clients.

Front-End Developer • Brahvi Media

2011 — 2012

- Turned designs into markup and kept an online magazine codebase running.

SKILLS
